

POLYDURE®

Leading polyester topcoat systems for HVAC

POLYDURE is the leading proprietary resin technology specifically tailored to the needs of the HVAC market.

- A proven polyester-based coating system, it provides a trouble-free application combined with a consistent, smooth film.
- Contains excellent forming properties and provides batch consistency along with a broad range of color, gloss and texture options to benefit your business and improve your projects.
- Versatility in field quality and performance is only rivaled by the service we provide.

Our portfolio of POLYDURE coatings provides a high quality premium appearance to protect your brand and projects for increased end user satisfaction.

Including our focus-formulated primers and backers as part of your entire coating system allows POLYDURE to perform at an optimal level. Ideal for commercial, industrial and residential HVAC systems, POLYDURE provides versatility with premium appearance and performance to meet the needs of your HVAC projects.

POLYDURE® N V1000

Optimized standard coating

Optimized standard coating is smooth and durable combined with built-in flexibility. Formulated with UV inhibitors and edge-coat corrosion resistance for exterior projects and stands strong in interior applications.

- Combines leading performance with premium appearance
- Exceptional performance during fabrication & transport

POLYDURE® N V1000 TX

Textured specialty coating

Textured specialty coating for superior scratch and abrasion resistance combined with built-in flexibility. Highly durable textured surface formulated with UV inhibitors and edge-coat corrosion resistance for exterior projects and stands strong in interior applications.

- Gives the substrate texture and dimension to be more forgiving in harsh environments
- Adds depth, dimension and style to meet any project need
- Lowers reject rates and increases throughput for maximum business performance
