CERAM-A-STAR® Expressions

A unique, high-performance silicone-modified polyester textured coating that achieves a wood grain effect finish, only available from AkzoNobel

CERAM-A-STAR® Expressions combines the visual appeal of textured prints with a high-performance, silicone-modified polyester finish offering endless creative and distinctive designs.

Industry-Leading Technology

Built on the advanced CERAM-A-STAR® 1050 platform.

Proprietary Formulation

Incorporates AkzoNobel's unique resins and additives for a robust, user-friendly coating.

Innovative Application

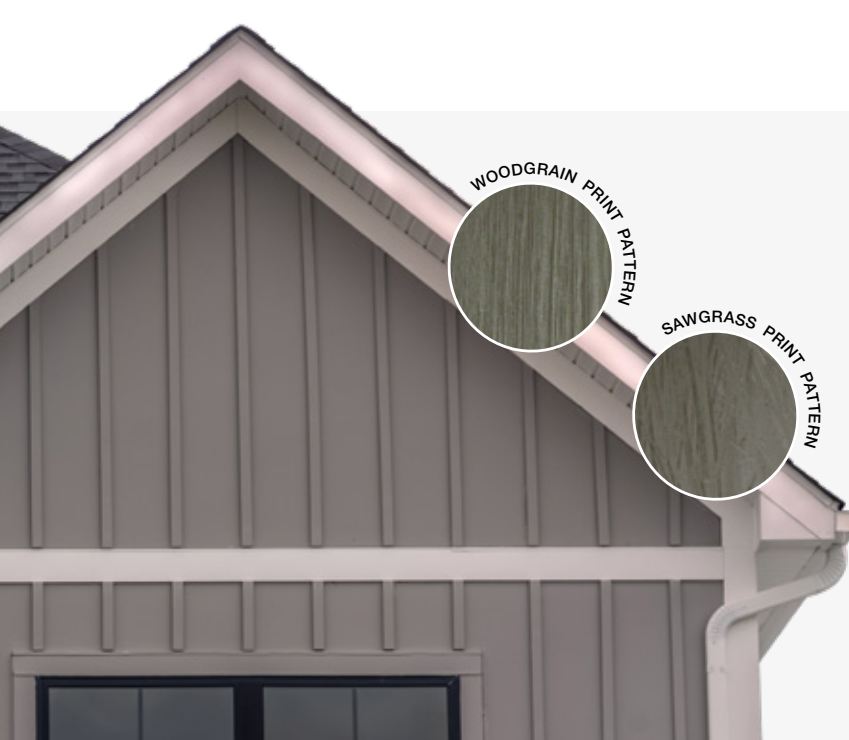

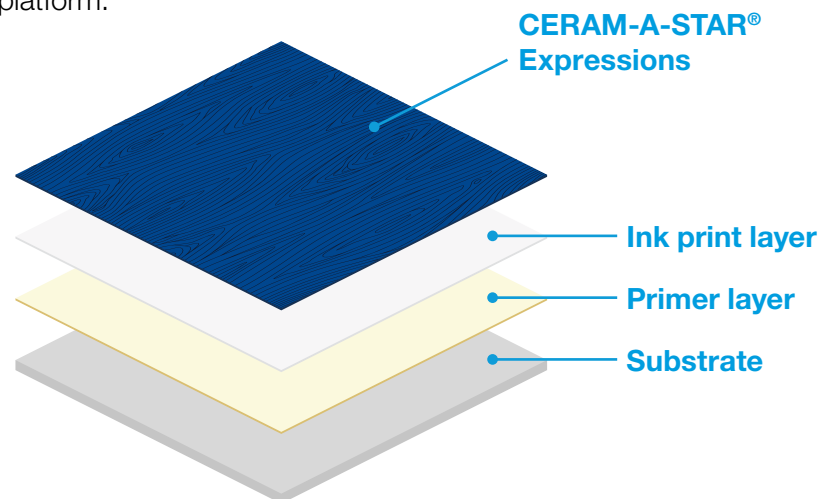

Applied over a cutting-edge ink layer and high-performance primer.

Versatile Aesthetics

Can convincingly mimic natural materials like wood, slate, or granite.

Superior Performance

Offers outstanding durability, moisture and UV resistance, flexibility, and abrasion resistance.

Standard print palette program

CERAM-A-STAR® Expressions is offered through a standard print palette program, providing readily accessible print materials to simplify the ordering process. Achieve a custom look and feel with ease of ordering.

Key benefits

- Selected prints ready when needed
- Improved stock availability
- Quicker turns on projects
- Reduced complexity

Field performance and application types

CERAM-A-STAR® Expressions is one component of a complete coating system. When applied as specified, it delivers the following field performance:

	Walls	Roofs
Film Integrity	40 years	40 years
Chalk	No more than #8 for 30 years	No more than #6 for 30 years
Fade	No more than 5 ΔE Hunter units for 30 years	No more than 7 ΔE Hunter units for 30 years

CERAM-A-STAR® Expressions is approved for use on HDG, Galvalume®, Galfan®, and Aluminum substrates. This factory-applied finish is roll-coated onto cleaned, pre-treated substrates and oven-baked to cure. It features a three-layer system: a topcoat and ink layers over an AkzoNobel High Performance Primer.

Especially suitable for board and batten, lap siding and accent pieces
